

Post-operative information: Open Inguinal Hernia Repair

You have undergone an inguinal hernia repair. Below are instructions and information as to what to expect.

Pain Medications:

- You will have some pain. I have prescribed a pain medication. Take this medication with food.
- Do not drive while on this medication. This medication may make you feel drowsy.
- Avoid taking Tylenol containing products while on this medication.
- It may also cause constipation. Drink plenty of water while taking it
- Unless you have a contraindication, you may supplement this medication with over the counter medications such as Advil or Aleve as directed on the bottle.
- Avoid alcohol intake while on prescription pain medication.

Dressings:

- All of your stitches are internal and will not require removal
- You have skin glue for dressings. Leave this on as long as possible (at least 10-14 days)
- You may use an ice pack on your groin/scrotum for 15 minutes on/15 minutes off for the first few days for comfort
- Wear snug fitting underwear to support scrotum for 1-2 weeks after surgery
- Some bruising in the groin and scrotum is normal. Call if this progresses after 24 hours after surgery

Activity:

- Be active but don't overdo it. Take several short walks a day over the next week.
- Do not lift more than 10 pounds for 6 weeks. Avoid strenuous exercise for 6 weeks.
- Shower the day following surgery. Do not soak or swim for 2 weeks.

Diet:

- It is common to have a poor appetite and mild nausea after any surgery. Call Dr. Lundy if this does not resolve in 1-2 days. Follow a low fat diet

Please call or go to the ER if:

You have severe pain, nausea, vomiting, bleeding or other discharge from your wound, fever > 100 degrees Fahrenheit, or any symptoms concerning to you. Please call if you do not pass gas for a day or don't have a bowel movement within 3 days of surgery. Some patients have difficulty urinating after surgery. Please call Dr. Lundy if you cannot pass urine within 8 hours of surgery.

Follow up:

Please call in 1 or 2 days to make an appointment to see me in the office in 1-2 weeks. Please let me know if you have any questions or concerns. I hope you feel better very soon.
